Hello,

My name is Jacob Engstrand, and I've been a professional computer programmer for over 10 years.

I'm not a lawyer in any way, but from what I understand, the settlement between the US government and Microsoft will not stop Microsoft from breaking the law and hindering innovation like it has done for several years now.

Something more than suggested by the current settlement must be done to stop their illegal behaviour.

Respectfully,

Jacob Engstrand
Uppsala, Sweden
